PROFILE SUMMARY

I am a second-year Computer Science Engineering student and MERN stack developer. I focus on mastering frontend and backend fundamentals to build practical, real-world full-stack applications.

My goal is to create clean, user-focused web interfaces. I am actively developing standalone projects to sharpen my technical skills and prepare for industry challenges.

EXPERIENCE

Full Stack Web Developer At Nexus Of Nerds

Internship | 3 Months

- Frontend Development: Designed and developed the responsive frontend architecture of the company platform using React.js and Tailwind CSS, integrating GSAP for fluid, high-performance UI animations.
- Real-Time Features & Auth: Built a scalable, real-time chat feature using WebSockets and implemented secure, seamless user authentication via Firebase (supporting both local and Google OAuth).
- Database & Quality Control: Maintained database integrity and optimized queries, while enforcing strict code quality standards through code reviews and refactoring.
- API Testing: Conducted rigorous backend testing and integration checks for API endpoints using Postman to ensure seamless data flow and zero-downtime deployments.

PROJECTS

PG Management & Resident Portal (MERN Stack Web Application)

- Developed a full-stack web application for PG management, providing detailed information about rooms, rent structure, staff, ownership, and facility details on the public home page.
- Implemented a secure user system where residents can register, and admin verifies accounts before granting login access with email authentication.
- Built core management features including rent tracking, resident profiles, complaint registration, and an admin dashboard to monitor and update resident data efficiently.
